

To Whom It May Concern,

I am pleased to recommend Vinod in recognition of his outstanding leadership, innovation, and dedication in delivering the enterprise-scale modernization of Resimac's Core Banking and Cards platforms.

Vinod played a pivotal role in advancing our digital banking strategy by leading the transformation of mission-critical platforms that have supported more than 40 million transactions over the past four years. Through his strategic vision, technical expertise, and commitment to excellence, he successfully delivered significant business and technology outcomes.

Key achievements include:

- Modernization of Resimac's Core Banking and Cards platforms, establishing a robust foundation for future growth.
- Delivery of next-generation digital banking capabilities that enhanced customer experience and operational efficiency.
- Implementation of real-time transaction processing architecture, significantly improving transaction speed, availability, and responsiveness.
- Strengthening of platform stability and service resilience, resulting in higher reliability and operational effectiveness.
- Achievement of a 60% reduction in batch processing windows, accelerating end-of-day processing and increasing business agility.
- Establishment of a scalable, secure, and future-ready banking ecosystem capable of supporting evolving business requirements.

Throughout the engagement, Vinod consistently demonstrated exceptional leadership, professionalism, and an ability to align complex technology initiatives with strategic business objectives. His contribution has delivered lasting value to the organization and positioned Resimac strongly for future digital innovation.

I have no hesitation in recommending Vinod for senior leadership roles involving large-scale technology transformation, digital banking modernization, and enterprise platform delivery.

Yours sincerely,

Paul Groom
